

## GLEAMS Curricular Goals

Equity in Education - Opportunity - Achievement

### Sustainability

Students recognize themselves as leaders capable of drawing upon their assets to prevent and address human, social, environmental, and economic issues.

### Global Citizenry

Students value their (school, local, state, national, and global) communities and recognize themselves as connected and responsible.

### Literacy

Students gain the ability to read, write, speak, and listen in a way that allows them to communicate effectively and proficiently.

### Collaboration

Students recognize the assets in others, and use strong communication skills to collaborate with others in order to prevent and solve problems.

### Economic Clarity

Students gain a foundational understanding of economics, and are capable of planning their financial futures and holding opinions about economic exchange.

Help us impact our local communities:

*Where Opportunity Knocks*

### Mission

To prepare students to compete in, succeed in, and contribute to a global economy.

**SCORE in Communities** partners with stakeholders to offer on-site integrated student support, expanded and enriched learning time and opportunities, active family and community engagement, and collaborative leadership and practices. SCORE collaborates with parents, caretakers, leading researchers, educators, local officials, skilled professionals, and concerned community members to develop and maintain an innovative plan to educate the **whole** child and provide wrap-around services to prepare students to compete in, succeed in, and contribute to a global economy.

#### AREAS OF FOCUS

- Opportunity
- Academic Achievement
- Protective Factors
- Place-Based Education
- Innovation
- Empowerment

GLEAMS Leadership Academy is a full-service community school that cultivates the gifts and talents of young leaders to thrive in their community with a commitment to academic, social, economic, environmental, and civic excellence. The middle school program is designed for 5th – 8th grade students who lack access to a high quality education and need more resources and opportunities to achieve. Over four years, the evidenced-based program provides a student-centered curriculum that includes interactive hands-on learning through various Project-Based Learning units encompassing all grade-level subjects across grades 5 through 8. Curriculum goals include reaching and exceeding benchmark standards in English Language Arts, Math, and Science, and guiding students toward completing Algebra 1 by the end of 8th grade.
